Description

The Digital Decor Printing Compass Course (DDP Compass Course) is a 3.5-day extensive course, which delivers about 30 hours of comprehensive knowledge along the value chain of digital surface decoration. The courses focus is digital decor printing covering roll-to-roll and flatbed printing with inkjet technology. Important topics like color management, inks, quality assurance, relevant applications and the latest market data, industry trends and technology news are incorporated in a condensed fashion. It includes a broad variety of case studies displaying different applications including success factors and checklists to support improving existing operations or entering into field of digital surface decoration. On top the course addresses topics like business design to support participants in driving innovation within their enterprises, digital transformation and business process management, leadership topics and sustainability most of it directly related to digital surface decoration.

What is the Target Audience?

The DDP Compass course is designed for executives, middle management and decision takers already working in the digital surface decoration industry or in a related field, whether with analog or digital printing presses or both. The course can also add value to individuals from neighboring or related industries, which are planning to enter the world of digital decor printing or want to inform themselves about the possibilities and opportunities. Typical professional educations addressed are executives, company owners, product managers, product owners, project managers, innovation managers, R&D engineers, decor design managers, pre-press managers, print production managers, shift supervisors, printing engineers and quality managers.
